SUMMARY
Computer science student focused on backend engineering with Java and Spring Boot. Enjoys designing

EDUCATION
B.Tech in Computer Science and Engineering, Example Institute of Technology, Pune 2022 - 2026
CGPA 8.6/10. Coursework: Data Structures, Algorithms, Database Management Systems, Operating Sys

TECHNICAL SKILLS
Languages: Java, Python, SQL, JavaScript
Frameworks: Spring Boot, Hibernate, React, Flask
Databases: MySQL, MongoDB
Tools: Git, GitHub, Maven, Postman, Linux, IntelliJ IDEA

EXPERIENCE
Software Engineering Intern | Example Fintech Pvt. Ltd. Jun 2025 - Aug 2025
- Built REST APIs in Java with Spring Boot for an internal loan-tracking dashboard used by 40 analysts.
- Wrote JUnit tests for the service layer and fixed 12 production bugs reported by QA.
- Optimised slow MySQL queries by adding indexes, reducing report generation time from 9s to 2s.
- Collaborated with a cross-functional team in two-week Agile sprints and took part in code reviews.

PROJECTS
Campus Library Management System | Java, Spring Boot, MySQL, Hibernate
- Designed a RESTful backend with JWT authentication and role-based access for students and librarian
- Modelled 8 relational tables with Hibernate and wrote integration tests for the borrowing workflow.
- Containerized the application with Docker and documented the API with Swagger.

Expense Splitter Web App | React, Flask, MongoDB
- Built a React front end and a Flask API that splits shared expenses between group members.
- Stored groups and transactions in MongoDB and deployed the app on Render.

Sentiment Analyzer for Product Reviews | Python, scikit-learn
- Trained a logistic regression classifier on 20,000 public product reviews with 87% validation accuracy.
- Built text preprocessing with NLTK and visualised results with Matplotlib.

CERTIFICATIONS
Oracle Certified Associate, Java SE 8 Programmer
Postman API Fundamentals Student Expert

ACHIEVEMENTS
Finalist, Example University Hackathon 2024 (team of 4).
